

My name is (your name) and I work for (agency name) which employees (number of employees) employees. I live in your district. I am opposed to tripling the tax on insurance producers so I encourage you to reject Senate Bill 5794.

- This huge tax increase harms local agents and helps big out-of-state insurance companies.
- This huge tax increase puts local neighborhood insurance agents at an even greater competitive disadvantage with GEICO and other national insurers who pay their sales employees salary instead of commissions, so they do not pay B & O taxes.
- Agents cannot increase their commissions to cover increased costs of new taxes because insurance companies – not agents – set the commissions levels.
- This is the only proposed tax increase that targets small businesses who create local jobs, sponsor community events and support community charities.

Please let me know if you have any questions about how this tax would impact me and the insurance agency I work for.
